The Society for Pediatric Anesthesia is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Society for Pediatric Anesthesia designates this educational activity for a maximum of 16.25 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity.
The Fundamentals of Pediatric Anesthesiology is a new course offered this year by the Society for Pediatric Anesthesia, designed to provide the anesthesiologist in community practice with core knowledge that he or she needs to keep current on issues pertaining to the anesthetic care of children. The meeting will take place March 20-21 in Jacksonville, Florida at the Hyatt Regency Hotel. It is a beautiful setting and large enough to accommodate both “Fundamentals” and The Society for Pediatric Anesthesia/American Academy of Pediatrics Section on Anesthesia Winter meeting concurrently.

This meeting is brought to you by the Society for Pediatric Anesthesia in recognition of the Society’s role in providing high quality educational offerings not only to those whose practice is devoted mostly or completely to pediatrics but also to our colleagues in general anesthesia practices who care for the vast majority of pediatric patients.

The program will be run concurrently with the SPA/AAP Winter meeting to ensure that the most knowledgeable, recognized, and experienced speakers in the field are available to provide those in attendance with the best value for their CME dollar. Although registration is separate, the concurrency allows “Fundamentals” attendees to take advantage of many of the afternoon workshops and refresher courses that are part of the SPA winter meeting.

The program covers many relevant topics for those who care for children in community hospitals. Included are discussions of premedication and the anesthetic induction with Peter Davis; Fritz Berry will discuss fluid and electrolyte management; Steve Hall, Randy Clark and Allison Ross will give attendees the opportunity to “Ask the Experts”; and Adrian Bosenberg will address common regional techniques.

The lecture portion of the meeting will conclude with “Tropical Shorts” a fast-paced overview of hot topics in pediatric anesthesia including; Anesthetic Neurotoxicity in Infants, BIS Monitoring, Dexmedetomidine Use in Pediatrics, and an update on Malignant Hyperthermia. Each of these brief lectures will be given by a recognized expert in the field.

It has been my pleasure to help organize this meeting with my colleagues; Nancy Glass, Lynn Martin, Paul Samuels and the SPA staff. Along with the SPA leadership, I would like to invite you to join us in Jacksonville where the focus will be on caring for children.

Randall P. Flick, MD, MPH, FAAP
Fundamentals of Pediatric Anesthesiology 2009 Program Chair

Meeting Information

Education Mission Statement
Fundamentals of Pediatric Anesthesiology will focus on topics of interest to the community anesthesiologist who cares for children in his or her practice. The goals of the meeting are to provide the attendees with the core knowledge necessary to provide care to children undergoing routine procedures in everyday practice.

Scope & Types of Activities
The program brings together experts in the anesthetic care of children to provide the attendee with a broad overview of important aspects of pediatric anesthesia. Topics include management of fluids and electrolyte, regional anesthesia, preoperative, intraoperative and postoperative management. The presentation format is varied and includes lectures, panel discussions, and hands-on workshops. Significant attendee involvement and feedback are encouraged in all aspects of the program.

Target Audience
This program is intended for the anesthesiologist and other practitioner who care for children in their practice anesthesiology. It is primarily focused on those who care for children in the community hospital setting.

Accreditation & Designation
SPA/Fundamentals of Pediatric Anesthesiology Program: The Society for Pediatric Anesthesia is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Society for Pediatric Anesthesia designates this educational activity for a maximum of 16.25 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Americans With Disabilities Act
The Society for Pediatric Anesthesia has fully complied with the legal requirements of the ADA and the rules and regulations thereof. If any participant in this educational activity is in need of accommodations, please contact SPA at (804) 282-9780 by March 1, 2009 in order to receive service.

FUNDAMENTALS OF PEDIATRIC ANESTHESIOLOGY

Preoperative Evaluation & Common Coexisting Disease in Children
Attendees should develop an understanding of common coexisting diseases encountered in the care of children

Premedication and the Anesthetic Induction
Those in attendance should gain insight into the various methods for premedication and induction in children

Fluid Electrolyte and Glucose Management
This lecture will provide attendees with a fundamental understanding of the management of fluids and electrolytes in children

Tonsillectomy - Not Always Routine
Attendees will gain appreciation of the many adverse events that may occur in the care of children undergoing tonsillectomy

“Ask The Experts”
This panel discussion will allow attendees to discuss issues of interest to them with a panel of well recognized pediatric anesthesiologists

Breakfast Panel: PACU Dilemmas
This panel will allow those in attendance to gain insight into the management of common problems encountered in the pediatric PACU

Pediatric Regional Techniques in Community Practice
Attendees will have the opportunity to be exposed to common regional techniques that are useful in community pediatric practice

Objectives

Common Emergencies in Pediatric Anesthesia
This lecture will provide attendees with basic knowledge needed to manage common pediatric emergencies.

Anesthesia and Sedation Outside the Operating Room
The purpose of this lecture is to provide an understanding of the organization management and practice of pediatric sedation

The Pediatric Airway: Tricks of the Trade
Attendees will gain an appreciation for the management of the difficult pediatric airway

“T(rott)opical Shorts”
This series of lectures is intended to provide a brief exposure to what is currently topical in pediatric anesthesia

WORKSHOPS & REFRESHER COURSES

Fellows Research Workshop
This workshop is intended to provide fellows with an overview of research methods.

Junior Faculty Workshop – Success in Academics
Junior faculty attending this workshop will be exposed to strategies for building a successful academic career.

Epidural Placement in Children, Infants and Neonates
Attendees of this workshop will gain experience in the use of epidural anesthesia in pediatric patients

Peripheral Nerve Block Workshop
1. Peripheral nerve blocks including head and neck blocks and upper and lower extremity blocks will be discussed

2. Nerve stimulation and basic ultrasound for nerve blocks will be discussed

3. Placement of peripheral nerve catheters and their management in the postoperative period will be discussed

New Devices and New Approaches to the Pediatric Airway
1. Develop an airway plan for normal and abnormal airway scenarios

2. Understand the use and indications of alternative direct laryngoscopy for securing the airway

3. Understand the indications, advantages and pitfalls to alternative airway devices in infants and children

Dexmedetomidine: Clinical Applications and Limitations
1. Review the pharmacology and physiology of dexmedetomidine

2. Understand the range of clinical applications of dexmedetomidine when used for procedural sedation, in the ICU, in the operating room

3. Understand the clinical limitations and risks with dexmedetomidine usage: Are the risks associated with concomitant medications, patient risk factors, the procedure itself or simply a nature of the drug itself?

4. Review via an interactive discussion between the faculty panel and the participants the shared experience with dexmedetomidine usage

Techniques for Difficult Peripheral Access
1. Review the advantages and limitations of near infra-red devices for achieving peripheral vascular access

2. Understand the issues in using ultrasound as an adjunct for peripheral IV access

3. Demonstrate the ease of intrasosseous access as a rapid source of peripheral access
FUNDAMENTALS
OF PEDIATRIC ANESTHESIOLOGY
Pediatric Anesthesiology for the Generalist
March 20-21, 2009 • The Hyatt Regency Riverfront • Jacksonville, Florida

SPONSORED BY THE SOCIETY FOR PEDIATRIC ANESTHESIA
Practical Approaches to Quality Improvement in Anesthesia
1. Discuss incident reporting
2. Discuss use of quality measures
3. Possible applications for Wiki discussions
4. Discuss the Toyota production system

Financial Management
This session will provide attendees with insight into various strategies for financial success.

Refresher Course – Pediatric Neuroanesthesia Principles and Update
1. Review applied neuroanesthesia principles
2. Update on pediatric neurosurgical anesthetic management
3. Demonstrate the importance of clinical investigation in children and how it influences management

Refresher Course – Management of Preoperative Anxiety in Children
1. Review the underlying psychological issues that affect the manifestations of preoperative anxiety in children
2. To discuss the multiple psychological and clinical outcomes that are associated with anxiety before surgery in children
3. To learn how to manage preoperative anxiety with interventions such as sedative premedication, parental presence, music and hypnosis

Workshop in Epidural Analgesia for Children
1. Techniques for the safe and effective placement of caudal, lumbar and thoracic epiduals in neonates and small infants
2. A review of the pharmacology of drugs used to provide epidural analgesia including recommendations for infusates and rates that are commonly employed to provide epidural analgesia in all pediatric patients
3. A review of the common problems that occur during epidural analgesia and how these problems can be effectively managed
4. A review of adverse neurological events associated with epidural analgesia in children

Advanced Ultrasound-Guided Regional Workshop
1. Upper extremity, lower extremity and truncal blocks
2. Paravertebral, epidural and caudal blocks
3. Techniques to enhance needle visualization with US guidance

Using ultrasound guidance to vascular access in neonates and children
1. To learn how to find landmark vascular structures using 2D ultrasound
2. To discuss tips/tricks to facilitate ultrasound-guided line placement
3. To practice these techniques with ultrasound models

Simulation in Pediatric Anesthesia
1. Review of medical simulation and it uses for education and training
2. Gain an understanding of the elements of performance that can be taught and assessed using high-fidelity simulation.

3. Experience a simulation scenario, gaining an understanding of the elements of team performance that could impact patient care

Teaching the Advanced ACGME Competencies
1. Describe the ACGME competencies including professionalism, interpersonal and communication skills, practice-based learning and improvement and system-based assessment
2. Discuss the use psychometric inventories targeted around specific teaching models to help better teach the advanced competencies
3. Appreciate and describe the importance of multiple learning modalities including reflection and community-building activities (use of inventories, small and large group interactive techniques) to teach the advanced competencies

Integrating Acupuncture in Pediatric Perioperative Care and Pain Medicine
1. Understand the current practice of acupuncture medicine
2. Learn the history and theory of acupuncture
3. Understand scientific evidence of acupuncture practice
4. Evaluate acupuncture meridian systems and micro-system paradigms
5. Incorporate acupuncture in pediatric anesthesia, and pain practice
6. Participate hands-on demonstration of acupuncture

Refresher Course – Craniofacial abnormalities: An Overview for the Pediatric Anesthesiologist
1. To understand the etiology and manifestations of craniofacial abnormalities
2. To review the current surgical approaches to craniofacial abnormalities
3. To understand the anesthetic risks and complications associated with the surgical repair of craniofacial abnormalities

Refresher Course – Anesthesia for Pediatric Spine Surgery
1. An overview of the most common pediatric spine surgeries
2. Pre-operative preparation and counseling for pediatric patients
3. Intra-operative anesthesia management and spinal monitoring
4. Post operative care and pain management
5. Recent advances in anesthesia for pediatric spine surgery
6. Conclusions

The Hyatt Regency Jacksonville Riverfront is located in the heart of the downtown business, entertainment and sports district, adjacent to the Jacksonville Landing and the Times-Union Center for the Performing Arts, and within minutes of Jacksonville beaches and shopping.

An ideal fit for leisure or business travelers, the hotel offers 966 newly-remodeled guestrooms, 110,000 sq. ft. of meeting and event space, five dining and lounge options, a 24-hour fitness center and much more. Experience the best of Jacksonville hotels at Hyatt Regency Jacksonville Riverfront.

Jacksonville bills itself as “America’s Health Center,” and the city is gaining prominence as one of the top health and medical destinations in the country. The area is home to more than 10 medical facilities providing highly-specialized services and technology. With a number of local businesses associated within the medical industry and the region’s first-rate meeting facilities, the city is attracting more medical meetings and conventions for associations and drug manufacturers.

Jacksonville has something to offer everyone. From miles of uncrowded beaches to ecological and nature based excursions, world-class golf courses and unique shopping and dining, you’re sure to find just what you’re looking for in a vacation destination!

I Hereby Make Application For:

☐ ACTIVE MEMBERSHIP: .................................................................................................................................................. $175
Physicians practicing in the US or Canada who have an interest in pediatric anesthesia, and are eligible to be members of the ASA, may vote and/or hold office.

☐ AFFILIATE MEMBERSHIP: .............................................................................................................................................. $175
Physicians not eligible to be members of the ASA, non-physicians with an interest in pediatric anesthesia. May not vote and/or hold office.

☐ ACTIVE/AFFILIATE JOINT MEMBERSHIP WITH CCAS: .............................................................................................. $200
Active and affiliate SPA members qualify for joint membership with the Congenital Cardiac Anesthesia Society.

☐ Active Joint ☐ Affiliate Joint

☐ INTERNATIONAL MEMBERSHIP: ................................................................................................................................. $50
Physicians practicing outside of the US and Canada who have an interest in pediatric anesthesia.

☐ INTERNATIONAL JOINT MEMBERSHIP WITH CCAS: ........................................................................................................ $75
International SPA members qualify for joint membership with the Congenital Cardiac Anesthesia Society.

☐ RESIDENT/FELLOW MEMBERSHIP: ............................................................................................................................ $40
Physicians in an approved residency training program or performing post residency fellowship training (not to exceed five years). Resident membership requires endorsement by program director. ☐ Check if you are a fellow in pediatric anesthesia.

Residency Location: ________________________________________________________________
